The Civil War--Important Diplomatic Correspondence.

Among our Washington telegraphic dispatches will be found a correspondence of great importance between Mr. Seward, our Secretary of State, and the Commissioners of the government at Montgomery. Now that war has begun, the interest attached to these letters is necessarily great. It will be seen that the Commissioners proposed to negotiate a separation on peaceable terms, on the ground that a revolution had been completed and the independence of the Confederate States established. This Mr. Seward de nies, and says he does not see in the events which have taken place in the South "a rightful and accomplished revolution, and an independent nation with an established government;" and moreover that he can not officially recognize them in the capacity they claim, and he must decline official correspondence with them. The Commissioners interpret this as tantamount to a declaration of war, and accept the gage of battle. They also accuse some members of the government of bad faith in deceiving them as regards the evacuation of Fort Sumter and the status quo of Fort Pickens. There has been a great deal said on this point in the newspapers for some time, much of it without authenticity or foundation. It is plain that both governments had made up their minds for war, and they will now fight in out .- New

Where he will be happy to meet all those afflicted withany kind of disease—and considered incurable by other practitioners. His remedies are only those which nature has so bountifully provided us with. In the treatment of disease he rejects the use of all poisonous drugs and minerals. Instead of enfeebling the system he invigorates, that nature may be able to expel the disease. It is to the knowledge of those great secrets that he owes his success, and in using which he defies all the Medical Faculty on the Continent to compete with him. All those who are suffering from Lung Diseases of whatever nature, are particularly desired to call, as one-half of the cases of consumption that are pronounced locurable by the Medical Faculty, and considered hopeless, are readily cared, an yield at once to his mild plan of treatment, from the very fact that not one physician in twenty have the proper instruments for examining the lungs, and those who have, are very few of them capable of judging the amount of kind of disease to which the lung is subject. He has cured hundreds upon hundreds of such patients, who had be a given up by other practitioners to die.

The idea that consumption is necessarily fatal has de-troyed more human life than the disease itself.

For all forms of Dyspepsia and Klöney Diseases he tests the urine, for the excesses deposited, which is the only possible plan to accretain the true cause of disease. possible plan to ascertain the true cause of disease.

The Dr. can show more certificates of cures, swern to by patients, than any other physician in America.

Not like hundreds of empirical swindlers, he never prepares his medicines until he ascertains the disease and it true cause. He has no putted nostrums that will cure all diseases.

To Males and Females of Youth and Maturity.

Seminal Weakness and Spermatorrhora. It is a melarcholy fact that thousands who are suffering under pale and Seminal Weakness and Spermatorrhora. It is a melancholy fact that thousands who are suffering under pale and insatiate disease are victims of secret habit, self above, gradually undermining their constitution—the disease institution between the patient of some proper and constitution where the patient from the patient gradually is shattered, constitution weeked, and they become subject only for a horpstal or mad-house, unless death comes in as a welcome guest to relive the patient from his suffering, and his frience from the patient evidence of his irregularities and errors. The penalty will not cease with the transgression, the constitution has received the shock, and nature, unabled can not repair the lightry. The only escape is found in prompt and proper medical treatment. The earlier this is sought the easier the cure. Generally the first symptome in males, are noctural and sometimes diurnal emissions. In either sex we find weakness of the stomach, abdomen, back and hour, lassitude, loss of memory, confued ideas, low spirits, thuidity, aversion to society, love of solitude, with general debflity, and frequently attended with cough and hectic fever. This disagreeable and awful complaint, with all its symptoms, can be relieved and promptly arrested by the Indian fierb Doctor and his new method of cure. He uses an instrument that will arrest the disease instantly, and without any exposure to the patient.

All those who call may depend upon an honest, candid and true statement of their case, and the possibility of his giving them relief—gratis. All those who can may depend upon the first strength of his giving them relief—gravis.

\* The Doctor permanently cures the Files, and defies the world to compete with him on Female Complaints.

The Dr. challenges the whole Medical Faculty for the treatment of Lung, Liver, Kidney Diseases and Dyspensia.
